## TABLE OF CONTENTS

- I. Petrographic Introduction: Magma and its Geological Origin ( by Prof. Dr. A.Bergeat)
- II. The Gas Content of Magma
- III. The Roots of Volcanoes
- IV. The Types of Volcanic Activity at the Earth's Surface
  - Precursors and Secondary Features of Eruptions
  - Volcanic Eruptions
    - 1) Subaeric Eruptions
      - a) Gas and Water Eruptions
      - b) Loose and Mixed Eruptions and their Secondary Features
      - c) Production of Lava in Mixed Eruptions
      - d) Volcanic Elevation
      - e) Fissure Eruptions
      - f) Eruptions of Snow- or Glacier-capped Volcanoes
    - 2) Sublacustric and Submarine Eruptions.
    - 3) Purely Effusive Eruptions
- V. The Subsiding of Volcanic Activity
- VI. Genetic Morphology of Volcanic Formations
- VII. Erosion of Volcanoes
  - a) Erosion of Active Volcanoes and of the Most Recent Volcanic Deposits
  - b) Erosion of Volcanoes with Solfataric Activity
  - c) Erosion of Older Volcanic Structures
    - Craters
    - Lava Streams
    - Ribs and Cracks of Strato-Volcanoes
    - Lava Tables
- VIII. Geography of the Active Volcanoes
  - Density of Locations
  - Individual Features of the Various Volcanic Regions
  - Frequency of Manifestations of Activity
  - Type of Volcanic Output
  - Volume of Volcanic Output
  - Periods of Activity
- IX. The Geographical Importance of Volcanoes
  - Water Conditions
  - Output of Minerals
  - Morphological Structures
  - Anthropogeographic Consequences of Eruptions and Other Volcanic Activities
- X. List of Active Volcanoes
  - 1) Atlantic-Indian Hemisphere
    - a) The Mediterranean
    - b) The Atlantic Ocean
    - c) The African Continent
    - d) The Indian Ocean
    - e) The Asiatic Continent
  - 2) Pacific Hemisphere

# RESTRICTED

RESTRICTED

- a) The Northwestern Edge of the Pacific Ocean
- b) The West-Southwest Edge of the Pacific Ocean
- c) The South-Southwest Edge of the Pacific Ocean
- d) The Northeastern Edge of the Pacific Ocean
- e) The Southeastern Edge of the Pacific Ocean

#### XI. The History of Vulcanology

- 1) Vulcanology in the Antiquity
- 2) Vulcanology in the Middle Ages
- 3) The Start of the Modern Age
  - a) The XVI Century
  - b) The XVII and XVIII Century
- 4) The First Half of the XIX Century
- 5) Vulcanology since the Second Half of the XIX Century
